Programming Languages	C/C++, Java, Python, JavaScript
Soft Skills	Leadership, Communication, Team Work, Problem Solving
Languages	English, Hindi

PROJECTS

Zenith Backend. A tool for a real estate company, Aura Estate Ltd. where I styled their webpages with React CSS and made their pages more legible to view. The web pages were styled exactly according to the proposed UI. Thereafter, the website saw a substantial increase in traffic. (Try it here)

Hospital Management System. A management system for the hospitals to take a record of their day-to-day data, in terms of doctors, patients and helpers. It can add, read, and modify data accordingly as and when needed. As of now, it is made in C++ as a command line utility, which I wish to extend as a web application. (View here)

Online Grievance Redressal System. An institutional utility implemented with React and ExpressJS is intended to take up student grievances and gets them assigned to the particular person for that category of grievance. It is in the development stage and would be delivered to the University upon completion. (View here)

Audio Call App. An internal application for a company to manage teams. The team members are grouped and they can contact each other via voice message or internet calls. I designed the UI of the webpage along with dynamising their team groups. The project is under development and will be used by the company as soon as it is completed. (View here)

EXTRA-CURRICULAR ACTIVITIES

- Lead at the Google Developer Student Club at ZHCET (View here) and helped students at the college to start their software development journey. Regular open-source enthusiast

- Interests - Music, Singing and Travelling

LEADERSHIP

- Leading college communities and constantly active in programs and contests. Involved in scheduling online workshops, Career Development Sessions and Technical Sessions as the Lead at GDSC ZHCET.
